

FUEL CONNECTIONS SERVICE

Tanks Monitoring and Management

BENEFITS:

- **VISIBILITY:** Real-time Automatic Tank Gauge (ATG) Monitoring Integrated into Network Management
- **ACCESSIBILITY:** Web-based Portal for unlimited users

SERVICE INCLUDES:

- Comprehensive Reporting:
 - Inventory Percentage
 - Inventory Gallons
 - Water Contamination Levels
 - Ullage
 - Deliveries
 - Non-responding ATGs
- Inventory Maintenance with Delivery Need Alerts & Notifications
- Site Groups

Every C-Store, fueling station, or any other business operation that sells fuel products needs accurate and timely inventory monitoring and automation. Most of these fuel systems function independent of other store systems such as Point-of-Sale (POS), business back-office management, security systems, etc.

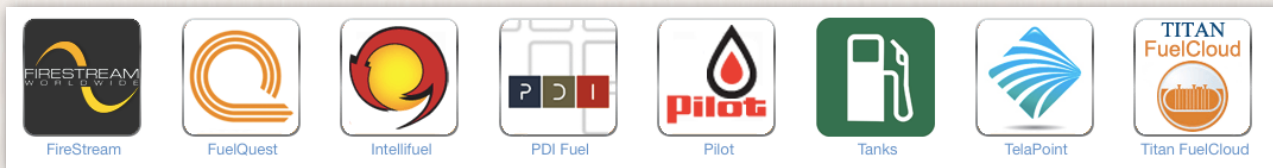

Yet, with the Acumera Fuel Connections Service, all this information can now be integrated into a single, comprehensive network and operational management system. That capability is key, because it is just as important to know when fuel inventories are about to be exhausted, or are experiencing leaks, as it is to know when a POS machine isn't processing card payments.

FUELS INTERFACE:

The Acumera Fuels Connections Service is one of many industry-specific software Apps that comprise the AcuVigil™ Dashboard.

The ATG Tanks App works in conjunction with your vendor specific fuel service interface.
