DUAL WAN FAILOVER (Optional Service)

In business, failure of primary connectivity is not an option!

To ensure constant connection, Acumera also offers its **Dual WAN Failover App**. This is applicable where a site is served by both a primary and secondary backup WAN circuit.

When a disruptive event occurs, Acumera's Dual WAN Failover App automatically switches network service from your primary circuit to your secondary circuit, and your business remains safe.

Secondary backup WAN circuits are most often cellular services on a data plan. Your Acumera representative can advise you on availability and pricing of such services and plans.

To order or for more information, please call Acumera at 512.687.7412, or email us at sales@acumera.net

About Acumera

Acumera provides managed network security and automation services for the payment systems and operations of multi-site businesses.
