Acumera®

Web Filter

CONTENT CONTROL & MALWARE PROTECTION

The Internet is critical to just about every business. Unfortunately, malicious websites, spyware, and viruses present real threats to the business that can't be ignored. There is also a growing need for retail businesses to fitter content in order to protect their employees from unsavory content or cut down on bandwidth costs.

Web Filter protects your business from threats by managing your Internet traffic. It filters what content employees can access, protects the network from malware and malicious attacks online, and controls bandwidth usage.

Why use Web Filter?

Web Filter is purpose-built with robust control and protection to users while being extraordinarily easy to set up and manage.

Web Filter is designed to integrate easily into your existing infrastructure and deployment is straightforward. Administrators can 'set it and forget it' while it protects your users from malicious websites, and inappropriate content.

Benefits

SECURE
Protect your business from malicious websites, malware & phishing.

FLEXIBLE
Integrate easily into your existing infrastructure. No complex deployment.

EFFICIENT
'Set it and forget it' from within the web-based user portal.

Web Filter Features

CLOUD-BASED

Deployed as a cloud based service, it is a DNS based solution requiring simple DNS redirect to the Acumera servers. This makes it simple to set up and manage.

MALWARE & PHISHING PROTECTION

Protect your network from malware and phishing attacks with categories of malware protection. Web Filter blocks access to compromised websites, malicious websites, spam-based websites and spyware.

POLICY EXCEPTIONS (CLOUD KEYS)

Web Filter allows the administrator to create exceptions to the general internet policy. Known as Cloud Keys; they can be created instantly and allow the user to bypass a policy rule. Each Cloud Key can be created for single or multiple users, and controlled by time or date.

ENFORCE SAFE SEARCH

Web Filter allows safe search to be enforced with a single click. This means that safe search is then enabled for Google, Yahoo, and Bing. Google SafeSearch is a powerful setting focused on reducing the inappropriate content from both search and image search results.

URL FILTERING

Web Filter filters website URLs into 53 predefined categories such as social media, news, pornography, gambling, etc. The system contains over 500 million website addresses in 200 languages, each sorted into the predefined categories. Combined with cloud based look up, users get highly accurate and flexible filtering based on the website's content.

FLEXIBLE POLICY CREATION

Using Web Filter you can easily create and manage your own policy to protect your users, including whitelists and blacklists of URLs and domains.

REPORTING

Customers have access to a full suite of over 50 predefined reports on user or group activity. Real time browsing activity can also be viewed. These reports can be scheduled, or exported in multiple formats.

ROAMING DEVICES

Web Filter is perfect for BYOD environments where employees use multiple devices on and off site. Web Filter offers you cloud-based DNS Filtering to bring powerful enterprise filtering to all your users, regardless of their location.
